My son and I each have XM radios in our cars and use the weather and traffic reports on a daily basis. Of particular concern to me is the fact I use mine in my motor home to get up to the minute reports on weather and traffic everywhere I travel, something I am unable to do on regular radio. It would be a disservice to thousands of people like me who finally have access to this information to take it away for the selfish concerns of the NAB!! Please for the sake of myself and all others in a like position, do the right thing and allow XM to continue this valuable service.
